

MAYURESH SINGH

Junior DevOps Engineer

mayuresh2k4@gmail.com · +91-8618839652 · mayuu.me · github.com/mayu-z · linkedin.com/in/mayu-esh

TECHNICAL SKILLS

Languages: Go, JavaScript, TypeScript, Python, Lua
DevOps & Cloud: Docker, Docker Compose, CI/CD, Terraform (IaC), AWS EC2 | IAM
Databases: PostgreSQL, MongoDB, Redis
Developer Tools: Git, GitHub Actions, Neovim, Typst
Other: React, Node.js, Tailwind CSS, FastAPI, BubbleTea (Go-Lang)

EDUCATION

IFIM College, Bangalore 2023 — 2026
Bachelor of Computer Applications (BCA)

EXPERIENCE

Junior DevOps Engineer | Docker, AWS EC2, CI/CD, Git 2025 — Present
Aexiz Solutions

- Provisioned and hardened AWS EC2 instances for 4+ production services, reducing manual setup time by 60% through repeatable configuration scripts
- Containerized 3+ services with Docker and Docker Compose, cutting environment inconsistency issues to zero across dev and production
- Engineered CI/CD pipelines that reduced deployment cycle time from manual multi-step releases to under 5-minute automated runs
- Administered Git/GitHub workflows across a multi-developer team — branching strategies, PR reviews, and release tagging for 2+ active repositories

Co-Founder | AWS, GCP, Azure, Oracle Cloud 2024 — Present
C3 — Cloud Computing Community

- Founded and scaled a vendor-neutral cloud community to 50+ members, covering hands-on learning across AWS, GCP, Azure, and Oracle Cloud
- Organized sessions and learning tracks that helped members go from zero to deploying on multiple cloud providers

TECHNICAL PROJECTS

YC Co-Founder — RAG Startup Advisor | Python, ChromaDB, Streamlit

- Built a RAG-powered startup advisor over 5 YC knowledge sources — Paul Graham essays, blog posts, Startup School transcripts, company data, and application context
- Implemented hybrid retrieval (semantic + keyword) with re-ranking and diversity filtering, achieving a 0.87 overall RAG score across a 100-question benchmark
- Developed a YC-style startup evaluator and similar-company retrieval system with hallucination and sourcing tracking across 100 benchmark questions

Real-Time Chat Application | MongoDB, Express, React, Node.js, Docker

- Engineered a full-stack chat platform supporting real-time bidirectional messaging via WebSockets with JWT-based auth across multiple concurrent users
- Containerized the full MERN stack with Docker Compose, reducing onboarding setup from hours to a single command

HACKATHONS

Aletheia — Multi-Agent Fact-Checker | FastAPI, LangGraph, Docker, Aptos Deep Hackathon

- Architected a multi-agent fact-checking system with 3+ specialized agents retrieving and cross-verifying sources in parallel, reducing single-source hallucination risk

- Built an autonomous agent that monitors CI/CD pipelines, detects failing tests, generates targeted fixes, and auto-commits patches — eliminating manual intervention for common failure patterns

CERTIFICATIONS

MCP Beginner & Advanced	— Anthropic <i>Building and deploying MCP servers with AI systems</i>	2025
Full-Stack Web Development Bootcamp	— Udemy, Dr. Angela Yu	Jan 2026
